# About Me

Born in Washington DC, I currently work as an Administrative Professional by day and perform Set Design for TV and Film on the side. I have been involved with film and theater since the early 1990's as an actress. Since then, I've booked various roles in the New Jersey and Washington DMV areas in local commercials, background for award winning series, various indie films, and Theater. I enjoy singing, acting, and writing and in the last few years, have decided to focus more on the production side of film. I started as a production assistant helping with everything from making runs to gaffing. I moved into various roles in the Art Department in indie film productions such as make up, FX make up and set design, where I found my niche.

A few major accomplishments for me are shooting my first short script titled, "Before the Underground" about the life of Araminta Ross a.k.a Harriet Tubman with help from some friends in the DMV. I have gone on to continue to work in production design for various projects in the which prompted me to start my own small business, Buddylove Set Design LLC. I also continue to write in my down time between projects with various scripts on my roster such as the features, "Promise", a supernatural thriller, "Only My Sister", a revenge drama, "Greener", a love story, and the shorts, "That Which May be Known" and "Here's Your Bike". I am not only inspired to continue to set design, shoot films, and write, but I am so very gracious and grateful for the many opportunities I've received to work with various talented people in the field and look forward for many more opportunities.

# About BL Productions

There is no better way to help tell a story than to do so with artistic visuals that enhance the story element with either subtle innuendos or with designs that pop. BuddyLove Set Design will provide design concepts to give an overall distinction to your film or television project. BL is dedicated to making sure that the design portion of your production is one less worry taken off your mind, (if that's possible), from preproduction up to and during the time of filming. BL works with student films, short films, low budget films, feature films, documentaries, TV shows and internet series. BL is also willing to work with theatres for plays big or small and with musicians for live shows.
